Basic properties and terminology. Being a subgroup of a symmetric group, all that is necessary for a set of permutations to satisfy the group axioms and be a permutation group is that it contain the identity permutation, the inverse permutation of each permutation it contains, and be closed under composition of its permutations. A general property of finite groups implies that a finite ... - Sat, 18 May 2019 02:25:00 GMT A00041 - OEIS
